## RESEARCH EXPERIENCE

**05/2020 - 08/2021**   **Research Assistant**, Department of Mathematics, University of British Columbia

- Cellular Trajectory Reconstruction in Equilibrium Systems:
  - Extended an approach for reconstructing cellular trajectories from a time series of RNA-seq data to a snapshot of a steady-state systems using optimal transport.
  - Collaborated with biologists to apply the new approach to two real-world datasets, leading to biological insights.
- Spatial Transcriptomics:
  - Designed simulations to help experimentalists identify limiting factors in a novel spatial transcriptomics method for reconstructing cell positions in RNA-seq data without imaging.

**09/2019 - 09/2020**   **Research Assistant**, Institute for Resources, Environment, and Sustainability, University of British Columbia, Vancouver, BC

- Global Connectivity Modelling:
  - Modeled the connectivity of protected area networks under several scenarios designed to meet conservation targets while minimizing caloric loss.
  - Ran continent-level analyses of connectivity, comparing the overlap of high connectivity-value areas to areas prioritized by existing conservation schemes.
- Ecoacoustics:
  - Designed acoustic permeability signatures for forested and agricultural landscapes to study correlations between the acoustic environment and the presence vocal amphibian species.

**09/2019 - 05/2020**   **Honours Thesis**, Algorithms Lab, Department of Computer Science, University of British Columbia, Vancouver, BC

- Developed a continuous approximation to the classic learning problem of prediction with expert advice for a small numbers of experts.

**05/2019 - 08/2019**   **Fellow - Data Science for Social Good Program**, University of British Columbia Data Science Institute, Vancouver, BC

- Integrated six datasets to a common spatial system and designed an SQL database to allow city planners to visually interact with the data.
- Created a model to identify and rank charging sites, developing an objective that incorporates both potential usage and even access to chargers for residents across the city.
