

I'm a computer science PhD student at Cornell interested in building better decision making systems with optimization and machine learning methods, collaborating with transit planners, resource managers, and scientists.

EDUCATION

- 2021 - Present **Ph.D. Computer Science**, Cornell University
Advisors: Andrea Lodi, David Shmoys
Research areas: discrete optimization, machine learning, operations research
- 2020 **B.Sc. Honours Computer Science**, University of British Columbia

RESEARCH

- 2025 - Present **Digital Twins for Transit Planning, Cornell University**
Developed a digital twin for the New York bus system to simulate and compare interventions using either open data or internal data obtained through an MTA partnership. Compared four interventions on over 300 routes, finding bus spacing is often more impactful than faster speeds or boardings. Modeling and designing interventions with discrete optimization.
- 2024 - Present **Optimization for Fisheries Planning, Cornell University**
Working with fisheries experts to model and design interventions to reduce community-level income variability in Alaska using mathematical programming and machine learning. Initial models show the potential to reduce income variability by over 50% and highlight vocational training as a policy lever.
Greenstreet, L., Q. Shi, M. Grimson, F.W. Simon, S.A. Sethi, C.P. Gomes, D.B. Shmoys, A. Lodi. Reducing Income Variability in Natural Resource Portfolios via Integer Programming. CPAIOR, 2025. doi.org/10.1007/978-3-031-95976-9_2
- 2022 - 2024 **Deep Learning for Aquaculture Mapping, Cornell University**
Developed deep learning models to map aquaculture development from satellite imagery, using multi-spectral data, contrastive learning, and masking to handle few labeled examples and generalize to new regions. Models were used by ecologists and the Brazilian government to understand environmental impacts and development trade-offs.
Greenstreet, L., J. Fan, F.S. Pacheco, Y. Bai, M. Eichemberger Ummus, et al. Detecting Aquaculture with Deep Learning in a Low-Data Setting. SigKDD 2023 Fragile Earth Workshop.

- 2020 - 2021 **Trajectory Inference for Single-Cell Data, University of British Columbia**
Developed trajectory inference methods to understand spatial and temporal patterns in genomic single-cell sequencing data. Worked closely with medical researchers and biologists to demonstrate the methods in multiple biological systems.

- 2020 - 2021 **Trajectory Inference for Single-Cell Data, University of British Columbia cont.**

- 2019 **Electric Vehicle Infrastructure Planning, University of British Columbia**
- Worked with planners from the City of Surrey, British Columbia to inform their electric vehicle strategy by creating an electric vehicle charger placement model and designing and testing a dashboard with city planners to visualize model outputs alongside socio-economic and planning data.

FELLOWSHIPS AND AWARDS

- 2025 **Siegel PiTech PhD Impact Fellowship**, Dept. of Computer Science, Cornell University
- 2022-2026 **Graduate Teaching Award x5**, Dept. of Computer Science, Cornell University
- 2020 **Undergraduate Summer Research Award**, Natural Sciences and Engineering Research Council of Canada (NSERC)
- 2019 **Data Science for Social Good Fellowship**, UBC Data Science Institute

INTERNSHIPS AND EXPERIENCE

- 2026 **Emerging Talent Graduate Intern**, Metropolitan Transit Authority
- 2020-2021 **Research Lab Assistant**, Dept. of Mathematics, University of British Columbia

LEADERSHIP AND SERVICE

- 2024 **Organizer**, AI for Science Seminar
- 2023 **Organizer**, NeurIPS Computational Sustainability Workshop
- 2023 **Mentor**, BURE Undergraduate Research Program, Cornell
- 2023-2024 **Assistant Organizer**, AI for Science Program, Cornell
- 2020-2021 **Mentor**, Data Science for Social Good Program, UBC Data Science Institute

TECHNICAL SKILLS

Languages: Python, SQL, R, Julia

Libraries: PyTorch, NumPy, Scikit-learn, SciPy, Gurobipy, CVXOPT, Geopandas

Software: Git, Anaconda, Linux, Postgres, Azure, Gurobi, PowerBI, Google Cloud, QGIS

Skills: deep learning: CNNs, GNNs, transformers, contrastive learning; manifold learning; mathematical programming; statistical modeling; data analysis; data visualization; time-series analysis
